Objective

Computer Engineering student with Python/C++ foundations and Git-based open-source experience, including software for the PSLab hardware instrument. Seeking a Robotics Intern role to build, test and document real robot systems.

Technical Skills

Programming: Python, C++, C, JavaScript, TypeScript, SQL
Tools & Practices: Git, GitHub, code reviews, issue-based development, debugging, Postman, Jupyter Notebook, VS Code
Computer Science: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, DBMS
Backend & Web: Flask, FastAPI, Node.js, REST APIs, React, PostgreSQL, SQLite

Experience

Software Developer Intern (Full-time) Sept 2026 – Mar 2027
Savitribai Phule Pune University (SPPU) *Pune, Maharashtra, India*

- Working full-time under the direct supervision of Dr. Jyoti Yadav as a software developer on an **AI project with a research focus**, contributing to project execution and implementation.
- Performing data analysis and maintaining regular progress documentation, delivering assigned milestones while following institutional standards and ethical guidelines.

Open Source Contributor 2026 – Present
FOSSASIA *Remote*

- Contributed to PSLab App, the companion app of an open-source hardware instrument, with **15 merged Pull Requests**, resolving issues and implementing feature improvements.
- Contributed to Magic Epaper App with **14 merged Pull Requests**, improving stability, performance and code quality.
- Contributed to Eventyay with **12 merged Pull Requests**, fixing bugs and improving features.

Open Source Contributor 2026 – Present
OWASP Foundation *Remote*

- Contributed to OWASP Cornucopia with **26+ commits** and 10+ merged Pull Requests, fixing bugs, improving documentation, and enhancing developer experience through code reviews and issue-based development.

Projects

FinSight: Financial Intelligence Platform for MSMEs GitHub | Live Site | Demo

- Built a full-stack platform unifying expenses, revenue, receivables, payables, vendors and customers for small businesses, with risk detection and **30/60/90-day** cash-flow forecasting from real historical data.
- Built a What-If Simulator with **5 scenario types** and an AI Business Copilot grounded strictly in each business's own data, so it never invents financial information.
- Implemented invoice OCR extracting **8 fields** (vendor, dates, GST, totals) from PDFs and images, with per-business data isolation.

Tech: React, TypeScript, Node.js, PostgreSQL, Drizzle ORM, OCR, AI integration

FoodLens: Food Transparency Web App GitHub

- Built a full-stack app to scan a barcode or search **3M+ products** (Open Food Facts) and instantly see nutrition facts, ingredients, allergens and a health score.
- Implemented live in-browser camera barcode scanning with manual fallback, product comparison, healthier alternatives and scan history.

Tech: React, TypeScript, FastAPI, SQLAlchemy, PostgreSQL, Alembic, JWT

Achievements

- Finalist in 4 National-Level Hackathons, achieving Top 5/Top 10 positions across multiple competitions.
- 50+ merged Pull Requests across FOSSASIA and OWASP Cornucopia; 100+ Pull Requests and 800+ GitHub contributions across multiple organizations.
- Solved 150+ LeetCode problems focused on Data Structures & Algorithms.
- Selected Contributor for GirlScript Summer of Code (GSSoC) 2026.

Education

AISSMS Institute of Information Technology, Pune 2024 – 2028
B.Tech. in Computer Engineering *CGPA: 7.19 / 10 | SGPA: 8.18 / 10*
