Prajakta Kamble

prajakta.gorakh.kamble@gmail.com | +91 70280 62979 | GitHub | LinkedIn | LeetCode

Technical Skills

Languages	C, C++, Python, JavaScript, SQL
Frontend	HTML5, CSS3, JavaScript, Tailwind CSS
Backend	Flask, FastAPI, REST APIs
Databases	SQLite, MySQL
Tools & Platforms	Git, GitHub, VS Code, Postman, Jupyter Notebook
Core CS	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Open Source Experience

Open Source Contributor *2026 – Present*
FOSSASIA *Remote*

- Contributed to **Eventyay** with **7 merged Pull Requests**, fixing bugs and improving application functionality.
- Contributed to **PSLab** with **5 merged Pull Requests**, enhancing features and resolving issues.
- Contributed to **Magic Epaper App** with **13 merged Pull Requests**, improving stability and code quality.
- Collaborated with developers worldwide using **Git, GitHub**, issue tracking, code reviews, and pull request workflows.
- Gained practical experience in open-source development while preparing for **Google Summer of Code (GSoC) 2027**.

Projects

Health Platform — AI Powered Healthcare System *Python, Flask, HTML, CSS, JavaScript, SQLite*

- Developed an AI-powered healthcare platform providing healthcare assistance through a user-friendly web interface.
- Built an **AI Health Assistant** capable of answering health-related queries.
- Integrated **Hospital Finder** and **Government Health Scheme** modules for easier access to healthcare services.
- Implemented **Medicine Reminder** and **Appointment Reminder** features for better patient management.
- Designed responsive frontend interfaces and developed backend services using Flask.

UrbanPulse — Smart Traffic Management System *Python, Flask, HTML, CSS, JavaScript*

- Developed a smart traffic monitoring platform for urban traffic analysis and management.
- Built real-time dashboards to visualize traffic data efficiently.
- Designed scalable backend APIs using Flask.
- Focused on improving traffic monitoring and urban mobility through intelligent data visualization.

MATRIX — e-Voting System *React, TypeScript, Node.js, SQLite*

- Built a secure electronic voting platform with user authentication and admin management.
- Developed role-based dashboards for administrators and voters.
- Implemented secure vote submission and election result management.
- Designed a responsive frontend using React and TypeScript while managing backend services with Node.js.

Achievements

- Finalist — **TENET Hackathon 2025**
- Active Open Source Contributor at **FOSSASIA**
- **25+ Merged Pull Requests** across Eventyay, PSLab, and Magic Epaper App
- Solving Data Structures & Algorithms problems daily on **LeetCode**
- Building AI, Full Stack, and Open Source projects
- **Google Summer of Code (GSoC) 2027** Aspirant

Education

AISSMS Institute of Information Technology, Pune 2024 – 2028
B.Tech. in Computer Engineering CGPA: **7.19 / 10** — SGPA: **8.18 / 10**
Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering
