Prajakta Kamble

prajakta.gorakh.kamble@gmail.com | +91 70280 62679 | GitHub | LinkedIn | LeetCode | Portfolio

Technical Skills

Programming:	C, C++, Python, JavaScript, SQL
Web Development:	HTML5, CSS3, Tailwind CSS, Flask, FastAPI, REST APIs
Databases & Tools:	MySQL, SQLite, Git, GitHub, VS Code, Postman, Jupyter Notebook
Computer Science:	Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Open Source Experience

FOSSASIA *2026 – Present*

- Contributed to **Eventyay** with **12+ merged Pull Requests**, fixing bugs, improving features.
- Contributed to **PSLab App** with **10+ merged Pull Requests**, resolving issues and implementing feature improvements.
- Contributed to **Magic Epaper App** with **14+ merged Pull Requests**, improving stability, performance, and code quality.

OWASP Foundation *2026 – Present*

- Contributed to the **OWASP Cornucopia** project with **12 commits** and **10+ merged Pull Requests**, fixing bugs, improving documentation, and enhancing the developer experience.
- Submitted and merged pull requests following open-source best practices, including code reviews and issue-based development.

Projects

PulseNova – AI Powered Digital Healthcare Ecosystem GitHub

- Developed a full-stack **AI-powered Healthcare Platform** integrating **10+ healthcare modules** and **50+ working features** using **Python, Flask, JavaScript, and SQLite**.
- Built an **AI Health Assistant** with **text & voice interaction** and multilingual support in **3 languages**, enabling users to receive instant healthcare guidance.
- Integrated **50+ Government Health Schemes**, **30+ hospitals** with live-location search, hospital details, helpline numbers, and emergency healthcare services.
- Implemented **75+ wellness tips**, **2 smart reminder systems**, Gym Trainer, and Health Insurance & Medicine Portal, delivering a comprehensive digital healthcare solution.

MATRIX – Secure e-Voting System GitHub

- Developed a full-stack **Matrix-Themed E-Voting System** integrating **8+ core modules** and **25+ features** using **React, TypeScript, Node.js, Flask, and SQLite**.
- Engineered a secure voting workflow with **AES encryption**, **SHA-256 hashing**, **role-based authentication**, and **one-vote-per-user** validation to ensure vote confidentiality and election integrity.
- Built dedicated **Admin** and **Voter dashboards** supporting election creation, candidate management, voter verification, secure vote casting, live result monitoring, and downloadable **PDF election reports**.
- Designed a responsive **Matrix-inspired UI** with React, Tailwind CSS, and Three.js, featuring real-time result visualization, anonymous voting, and interactive election analytics for an enhanced user experience.

UrbanPulse – Smart Traffic Management System GitHub

- Developed **UrbanPulse**, an AI-powered Smart Traffic Management System integrating **6+ core modules** and **20+ intelligent features** using **Python, Flask, Scikit-learn, and Aptos Blockchain**.
- Implemented a **Federated Learning** pipeline with **FedAvg aggregation**, **Ridge Regression**, and **Polynomial Features** to enable privacy-preserving distributed traffic prediction across multiple traffic signal agents.
- Built a secure, modular backend supporting **real-time traffic optimization**, **multi-agent coordination**, **emergency corridor management**, and blockchain-based audit logs for transparent and tamper-proof traffic operations.
- Designed an interactive monitoring dashboard featuring **live traffic analytics**, signal optimization, system health monitoring, and blockchain activity visualization for intelligent urban traffic management.

Achievements

- Finalist in **4 National-Level Hackathons**, achieving **Top 5/Top 10** positions across multiple competitions.
- Active Open Source Contributor at **FOSSASIA** with **35+ merged Pull Requests** across Eventyay, PSLab App, and Magic Epaper App.
- Contributed **10+ merged Pull Requests** to **OWASP Cornucopia**.
- Solved **100+** LeetCode problems focused on Data Structures & Algorithms.
- Selected Contributor for **GirlScript Summer of Code (GSSoC) 2026**.

Education

AISSMS Institute of Information Technology, Pune 2024 – 2028

B.Tech. in Computer Engineering CGPA: **7.19 / 10** | SGPA: **8.18 / 10**

Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Software Engineering
